

Deployment Services

Leave all set-up efforts to us.

Implementing a large amount of new IT devices can be very time-consuming and requires in-depth planning and know-how. With our Deployment Services you can leave all that to us as we take care of all necessary steps between the initial purchase and a perfectly performing workplace being set up at your site.

Our services range from custom delivery, including non-standard workdays and professional on-site installation, to data migration and the dismantling of your legacy assets. Depending on which services you need, you can purchase these individually or in combined packages.
